

# Quick Start Guide: Campus-Wide License

## Overview

This guide describes how to install and activate a Campus-Wide License. The Campus-Wide License allows access on university-owned computers to all faculty, staff and students. Faculty, staff, and students are also able to install MathWorks software on their personally-owned computers. The Campus-Wide License supports three configurations: Individual for personal use, Concurrent for on-campus computing facilities, and Non-Networked Shared Computers.

This guide includes detailed instructions for both administrators and end users.

## Deployment for Individuals (Through MATLAB Portal)

The **Individual** license should be used by students, faculty, and staff to download an individual stand-alone copy of the software for each of the machines on which they are the sole MATLAB user (includes university-owned and personal machines). The MATLAB Portal should be used to distribute this license. The MATLAB Portal is where end users can download MATLAB, get free training, contact support, and discover additional resources.

### Summary of Steps:

1. Administrator makes the MATLAB Portal URL available to end users.
2. End user retrieves MATLAB Portal URL from University website or documentation.
3. From MATLAB Portal, students, faculty, and staff select 'Sign in to get started' under the **Get MATLAB and Simulink** section.
4. When Federated Identity Management is implemented, end users will be required to login with their university credentials before creating or logging into a MathWorks account.
5. End users follow the guided workflow for creating or logging into a MathWorks account in order to automatically associate to the license.
6. End Users download, install, and activate the software.

### End User: Download the Installer

\*Note- for users who did not already download the installer

1. Go to MATLAB Portal provided by your University. Select '**Sign in to get started**' under the **Get MATLAB and Simulink** section.
2. Log into your MathWorks account that is associated to your University license. (Note – you may be asked to login with your university credentials first).
3. Click the **download** button for the current release. (Users can also download previous releases here).
4. Choose a supported platform and download the installer.

## End User: Install and Activate

1. Run the **installer**.
2. In the installer, **select Log in with a MathWorks Account** and follow the online instructions.
3. When prompted to do so, select the **Academic – Total Headcount** license labeled **Individual**.
4. Select the products you want to download and install.
5. After downloading and installing your products, keep the **Activate MATLAB** checkbox selected and click **Next**.
6. Follow the prompts to activate MATLAB.

**\*Note-** Detailed installation instructions can be also found in the link below:

How do I install MATLAB?

## Bookmark the MATLAB Portal as an ongoing resource:

- **Learn MATLAB-** links to MATLAB Onramp (free 2-hour overview of MATLAB) and other course offerings.
- **MATLAB Help-** Provides link to installation support and documentation.
- **Teach with MATLAB-** Instant access for educators to free courseware, webinars, and other tools to integrate MATLAB and Simulink into your curriculum.
- **What's New-** highlights of new resources available for Universities
- **MATLAB Online-** use MATLAB in a web browser without installing, configuring, or managing any software.
- **MATLAB Mobile-** evaluate MATLAB commands, create and edit files, visualize data, and view results – all from your iPhone, iPad, or Android device.

## Concurrent for On-Campus Computing Facilities

The **Concurrent** License should be used to simplify deployments at on-campus computing facilities such as computer labs. Access to the software is limited to a network-only configuration using the FlexNet License Manager. An administrator is responsible for maintaining the license server and upgrading the license manager at each release.

### Administrators: Set Up License Server and Install

1. [Activate the license server](#) for the Total Headcount license labeled Concurrent in the License Center.
2. [Install license manager](#) on one or more license servers.
3. [Install software on client computers](#).

## Deployment for Non-Network Shared Computers

The **Campus** License should be used for single computers that cannot connect to the University license server(s), which are shared by **several people** for MATLAB use. (**Note-** This license should only be used for scenarios where Concurrent and Individual cannot be used).

Installation instructions can be found in the link below:
